

<b>CLIMBING PLANTS</b>	all container	27
Campsis Flamenco		7.00
Self clinging with brilliant orange trumpets		
Clematis montana varities	small pink or white flowers in spring	6.50
Orientalis	small yellow bells during summer	6.50
finetiana (E)	clusters of small white flowers	7.00
Hedera (Ivy) in variety		6.00
Hop golden		7.00
Hydrangea Petiolaris	self clinging	6.60
Jasminium nudiflorum	winter flowering yellow jasmin	6.60
Officinale	white scented summer flowering	6.60
Lonicera (Honeysuckle)		6.60
Halliana (E)	yellow scented, vigorous	
periclymenum Belgica,	early Dutch yellow, red markings	
Serotina,	late Dutch yellow, red markings	
Italica	early flowering, soft pink scented	
x tellmanniana	large orange flowers	
Parthenocissus quinquifolia	Virginia Creeper clings with tendrils	6.60
tricuspidata Veitchii	Boston Ivy self clinging	6.60
Passiflora caerulea	blue passion flower	6.60
	Amethyst	6.60
Pyracantha (Fire Thorn) (E)		3lit 6.60 7.5lit 10.00
Fructo Luteo	yellow berries	
Orange Charmer	orange berries	
Red Pillar	red berries	
Solanum Glasnevin	free flowering climber with blue mauve flowers throughout the summer. Related to the potato plant	6.60
jasminoides Album	similar to 'Glasnevin' but with white flowers	6.60
Vitis colgnetiae	strong growing leaves 30cm across scarlet autumn tints	8.00
vinifera Purpurea	young leaves claret red turning purple	8.00

brachybotrys	Wild form	violet blue	short trusses
	Alba- 'Shiro Kapitan'	white	short trusses
	'Showa Beni'	magenta pink	short trusses
floribunda	alba – 'Shiro Noda'	white flowers	long trusses
	Black Dragon- 'Yae Kokuryu'	dark double blue	flowers
	Black Dragon (single) 'Kokuryu'	deep blue	early flowering
	Blue and white seedling		
	Domino – 'Issai'	Mid-length flowers of mid blue	
	Eranthema	Mid-length pale blue flowers	
	Hocker Edge	Long pale blue flowers	
	Lawrence	Pale blue longish trusses	
	Macrobotrys	Long pale lavender trusses	
	nana Richens Purple	Deep purple blue mid trusses	
	Peaches and Cream – 'Kuchibeni'	Pale lilac long trusses	
	Purple Snake	Long deep purple flowers	
	Rosea - 'Honbeni'	Long magenta pink trusses	
	Sinensis alba	Mid length white flowers	
	Amethyst	Deep violet blue mid length	
	Blue Sapphire	Compact deep blue trusses	
	Consequa	Compact deep blueflowers	
	x Burford	long trusses with large individual flowers	
	Caroline	compact trusses of pale blue	
	x Formosa	Late flowering blue form	
	x Lavender Lace	Very long trusses, pale blue	
Sinensis	alba	Mid length white flowers	
	Amethyst	Deep violet blue	
	Blue Sapphire	Compact deep blue trusses	
	Consequa	Compact deep blue trusses	

#### WISTERIA IN ORDER OF FLOWERING - APRIL / MAY

##### floribunda Kokuryu ( Single Black Dragon)

Normally the first to open. Mid blue, probably **the purest blue** (least red in colour)..Flowers mid length set off against pale lemon leaves that open with the flowers. Unfortunately leaves look as if they have a virus later in summer. The flowers also first to fade. See also fl. Bluebird for purest blue.

##### sinensis Amethyst

Deep violet blue flowers of mid length. Darker and with more red in colour than Kokuryu or Consequa. The smaller yellow blotch than on most wisteria giving a deeper overall colour. Flowers before leaves open but fades quickly in sunlight.

**brachybotrys collected in the wild**

29

Short rounded blooms of violet blue, similar in colour to Amethyst but set off against young bronze foliage. Flowers throughout the spring flowering period, longer than most varieties. Strong distinctive perfume

**floribunda Purple Snake**

Deep purple mid to long flowers. First of the longer flowered varieties to open. Flowers hang straight down and open before the leaves. Individual pips in the flowers tend not to open out retaining a rounded appearance like small grapes. This characteristic prevents the colour from fading during its long flowering period.

**Brachybotrys Shiro Kapitan** (Venusta or Alba)

Short rounded blooms of pure white set off against pale green leaves combined with long flowering period. One of the fastest wisteria to come into flower after planting.

**sinensis 'Consequa'**

Opens before the leaves with mid length blue /purple flowers. This variety deserves its place as one of the best and most commonly planted wisteria. Mature plants will often have a fair number of flowers again in July/August

**sinensis Blue Sapphire**

Mid to pale blue/purple flowers with large pips and average length. Similar to sinensis Consequa but with less red in the colour.

**sinensis Alba**

mid length flowers hang straight down coloured white with small yellow eye. Growth is lighter than other sinensis varieties.

**floribunda 'Domino'** (Issai)

Flowers of midlength and medium blue colour. Pips open to show yellow on a mauve background .

**floribunda 'Nana Richens Purple'**

Flowers mid to long in length and deep blue in colour. Individual pips do not open very much giving the appearance of deeper colour as the flower ages. A striking feature of this variety is the shiny foliage.

**brachybotrys 'Showa Beni'**

This variety has the best pink colour of any of our varieties. The colour is deeper than floribunda 'Honbeni' (Rosea) although the flowers are shorter and more rounded.

**X 'Lavender Lace'**

A variety with long flowers and large pips in the racemes giving the flowers a full appearance. The pips have a yellow white center with darker blue mauve surround

**Floribunda Eranthema** pale 'Wedgewood Blue' flowers of mid length. This variety rivals fl Kokuryu for being the purest blue.

29

**floribunda 'Kuchibeni'** ('Peaches and Cream')

Very long racemes with cream and white centres to the flowers surrounded by red purple, giving a distinctive mauve white appearance fading almost to white.

30

**X 'Caroline'**

This variety has short compact flowers of mid blue colour

**floribunda 'Honbeni'** ('Rosea')

Very long flowers of pale magenta pink colour. Similar in appearance to 'Kuchibeni' but with more pink in the colour.

**floribunda 'Hocker Edge'**

Flowers long in length and hang straight down. Similar to 'Lavender Lace' but open petals are darker.

**floribunda Lawrence**

Pale blue purple with large pips and long trusses

**floribunda Loders Purple**

Deep red purple flowers with mid length trusses. The individual pips are on the small side.

**floribunda Macrobotrys / 'Multijuga'**

Pale mauve variety with the longest flowers. Flowers often over 1m in length that hang in a dainty and attractive manner.

**floribunda 'Yae Kokuryu'** ('Black Dragon' or 'Violacea Plena')

The only wisteria with double flowers. The long blooms are dark purple in bud opening lavender blue. There is a lot of leaf out by the time the flowers open. On our nursery the flower truss does not all open at once with the top of the truss dyeing before the bottom is fully out.

**x formosa** mid blue and mid length flowers. Green foliage tends to appear with the flowers

**Floribunda 'Shiro Noda'** ('Alba' or 'Multijuga Alba')

The last of our wisteria to flower. The very long flowers are white and start opening before the leaves. A most variety to be recommended.
